

ADA EXOTICS

WILDPAPER

MAY 2022

CREATED BY THE FOUNDERS

Abstract

The Wildpaper was created by the founders of ADA Exotics to detail our journey thus far and explain what lies ahead for the project. We believe that for a project to be successful, prospective holders need to be able to trust the developers of the project and be able to clearly see the direction that it's heading in. Both trust and understanding are built on great communication between all parties, and the aim of this paper is to establish that communication to the best of our ability.

At the time of this paper's release, we have been gearing up for our second series. Our first series dropped in November of 2021, of which 1100 unique, eye-catching half-and-half animal designs (digitally-drawn by Angelina) were minted. During this time, we had an official collaboration with everyone's favorite memecoin, \$HOSKY Token, and started to build a great community.

We are firm believers that a combination of incredible artwork and great utility are the foundations of a successful project. For Series 2, we decided we wanted to go above and beyond, so we created an amazing collection of 3D artwork, also designed by Angelina.

Leading up to the launch of Series 2, we are working to secure partnerships to encourage the evolution of our project, one of which has been confirmed – CardaStacks. CardaStacks is a unique metaverse project where ADA Exotics holders will be able to come together in our exclusive space within their collaboration tower.

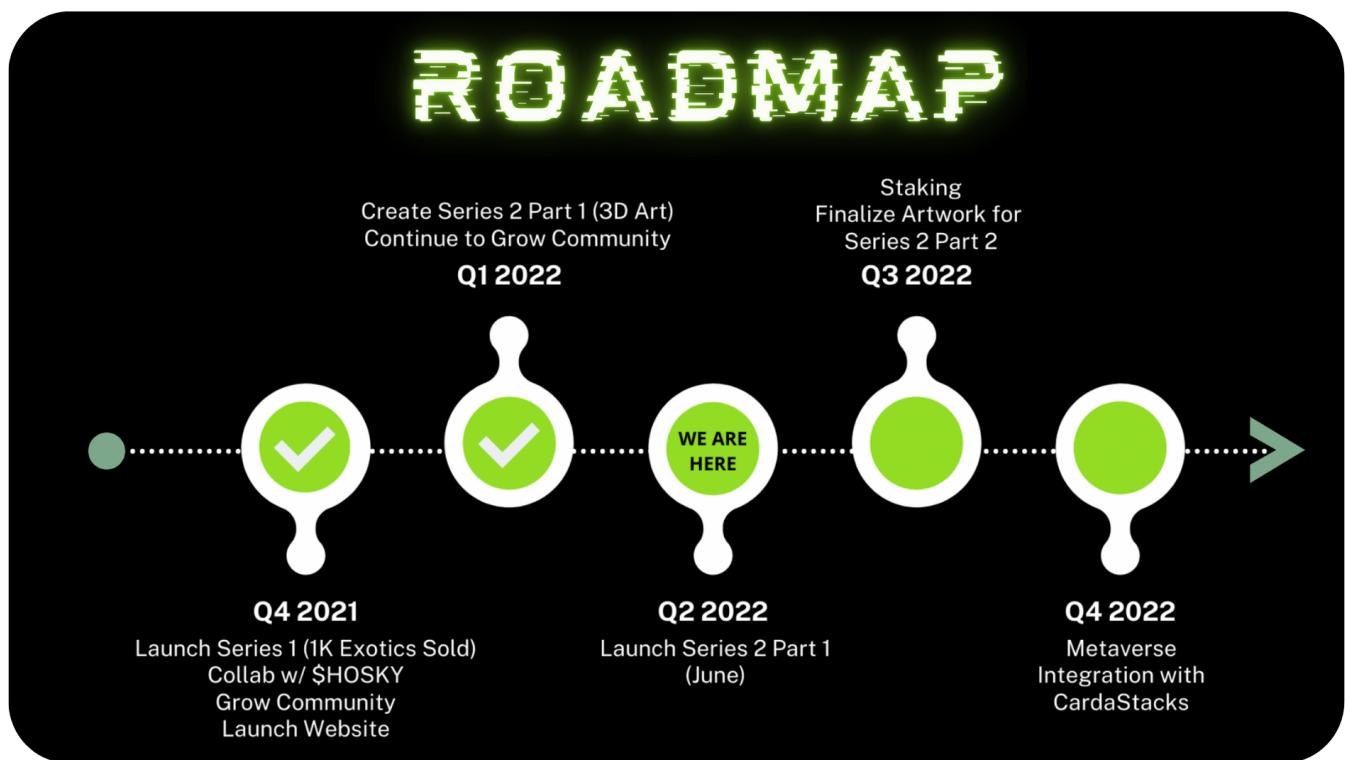

Additionally, ADA Exotic holders will be eligible to stake their NFTs from both Series 1 and 2, starting in Q3 of 2022. Staking will earn holders a certain amount of \$WILD token per day, dependant upon which and how many Exotic NFTs are staked. Staking and the utilities that come with it are explained in further detail within this document, along with more information on our partnership with CardaStacks.

Aside from the art and utility, we aim to build an engaged and close-knit community where all should feel welcome to express themselves. We host weekly game nights and regular giveaways, and are open to any suggestions our community may have. All of the aforementioned endeavors will commence throughout the entirety of 2022.

About & Our Mission

ADA Exotics is a project aimed at capturing the beauty of exotic animals and help those animals in need. Our project is comprised of 2 series, both of which showcase 10 endangered or near-endangered animals, including a tiger, lion, jaguar, cheetah, snow leopard, bear, wolf, polar bear, wild dog, and lynx. We hope to give back to these animals, while also creating a light-hearted and enjoyable place where our community can come together.

Roadmap

Series 1 launched in November of 2021, and 1100 Exotic NFTs were minted at the time. We were also fortunate to score an official collaboration with \$HOSKY token and were able to include the face of \$HOSKY within our collection! During Q4 of 2021, we also began to build our community and launched our official Twitter and Website.

In Q1 of 2022 we began the creation of Series 2, consisting of exception 3D art, using the same base characters as the original series. However, Series 2 has been split into two parts of five animals each. The first part will consist of the lion, tiger, snow leopard, wolf, and jaguar. The

remaining five will be released in the second part of Series 2. During this time, we have also focused on building and strengthening our community even further, and have planned to launch Series 2 during June of Q2, 2022.

Q3 of 2022 will bring staking and other utilities with it, which are further detailed within *Holder Perks*. Additionally, during Q3, Angelina will design the art for the second part of Series 2. Beyond this, we have a metaverse integration with CardaStacks to look forward to in Q4! This is also detailed later within this document.

The Team

Our team consists of three animal-loving, CNFT enthusiasts. Chris and Angelina are fully-doxxed, and have even made a YouTube videos regarding the project (check it out [here!](#)). Chris is our head dev and founder, along with our artist and co-founder, [Angelina](#), and our backend developer, Jasper.

Holder Perks

Creating a great amount of utility has been a prime focus of ours since we started working on Series 2. We have decided upon a strong number of holder perks which will be implemented upon launching Series 2.

1. **Staking** - You will be able to stake both Series 1 and 2 Exotic NFTs, and in return you will earn \$WILD which will have a number of utilities.
2. **Whitelist Benefits** - By owning either a Series 1 or 2 Exotic NFT, you will be automatically whitelisted for all future drops of the project.
3. **Royalties** - There will be a 5% royalty on all secondary market sales.
 - 40% will go to maintaining a healthy floor. If the floor looks extremely healthy, we can redistribute this money to other benefits.
 - 40% will go to holder only giveaways, including NFT airdrops from both ADA Exotics and other great CNFT projects, \$ADA airdrops every week, and a random buyer from secondary marketplaces will be airdropped either \$ADA or an Exotic NFT every week.
 - 20% will go to the continued development of the project.
4. **Specific Animal Benefits** - We have 5 animals in Series 2; The lion, tiger, wolf, jaguar and snow leopard. Their rarity in the collection is in relation to their rarity in the wild; The wolf will be the most common and the tiger is the most rare. Depending upon which animal you own. Below are detailed the specific animal benefits:

Wolf - Priority for W/L spots of partner CNFT projects. 75% of W/L spot allocation will go to those holding a wolf.

Jaguar - Increased staking rewards of 20% extra \$WILD per day.

Lion - Monthly \$WILD airdrops. Holders of a lion will be airdropped 500 \$WILD every month.

Snow Leopard - Monthly Exotic merch giveaways plus 10% extra staking rewards per snow leopard staked.

Tiger - 20% discount on all future mints.

We will also be creating exclusive holder-only channels within our Discord community. One for all of the holders, and then 5 separate ones only for those who own a certain animal. There will be a Lion, Tiger, Wolf, Jaguar, Snow Leopard and Lion exclusive chat set up where you can hang out with your fellow animal exotic holders!

Staking Utilities

Staking your Series 1 and 2 Exotic NFTs will begin shortly after the minting process for Series 2 has ended. By staking your Exotic NFTs, you will earn a certain amount of \$WILD token every day. You can then use this \$WILD token in a number of different ways. Please see the figure below for more information on staking rewards and applications.

Charity Donations

As we stated previously, part of our mission is to give back to exotic animals in need. We are extremely proud to announce that 15% of proceeds from our Series 2 collection will go to helping endangered animals in the Amazon. We have decided to donate to the Rainforest Trust, which helps protect the vast Amazon rainforest from the perils it faces today, and commits 100% of received donations to directly saving habitats and threatened species. [Check out The Rainforest Trust here.](#)

Other Future Plans

Series 2, Part 2

As we have decided to split Series 2 into 2 separate drops, the second part will consist of the brown bear, polar bear, lynx, African wild dog and cheetah. Following on from the completion of part 1 of Series 2, we will aim to have the artwork of part 2 completed within 2 months. The drop for part 2 is currently undecided but we will inform our community when we have chosen an appropriate time.

Metaverse Integration with CardaStacks

We are extremely excited to have officially partnered with [CardaStacks](#), which will bring even more utility to Exotic NFTs and our \$WILD token. CardaStacks is a metaverse project that is different from your typical land metaverse. Instead, CardaStacks consists of two tower buildings – one for the general public and one for their partner collaborations, now including ADA Exotics!

As a partner project we will be allocated a whole floor in the collaboration tower which we will be able to kit out in true exotic fashion. After Series 2 has completed minting, we will begin work on our floor within the CardaStacks tower. Holding an exotic NFT will give you the ability to purchase a virtual access card into the ADA Exotics floor. Within the floor, you will be able to hang out with other Exotics among a host of activities, and you will even be able to use your \$WILD token for online merch purchases. CardaStacks is still in the design phase of their creation, however, the collaboration tower should be completed by Q4 of 2022.

Conclusion

We hope that this Wildpaper has been helpful to gain deeper insight as to what ADA Exotics is about, and how we plan on making it a success. 2022 is going to be a very exciting year for everyone involved with ADA Exotics, from devs to holders, as there is a lot to look forward to. We have incredible artwork, staking, \$WILD token, plenty of holder perks and a metaverse integration with CardaStacks. We are committed to bringing the best we can to the table, and we hope you'll join us on this exciting journey to come!
